# INVERSION

## AUTOMATIC SHIATSU POINT LOCATOR

Shiatsu points, which differ according to the body type of each individual, are automatically detected by optical sensors. Even when used by multiple users, the massages are automatically customized to each individual, providing professional, quality and relaxing massage sessions.

## AUTO PROGRAMS

Massage professionals use technique, order and strength to give effective massages to the body. These techniques, orders and strengths can and has been incorporated into the INVERSION STRETCH AUTO PROGRAMS.

There are 6 auto programs that run from 6 - 38 minutes

- Full Body
- Area
- Fixed Point
- Head To Necky
- Upper Back

## MANUAL SETTINGS

Manually choose and select from any of the functions, intensities, and widths of the massage rollers to your preferences with one push of a button.

Choose Shiatsu, Kneading, Tapping or a combination of Kneading and Tapping to suit your massage sessions accordingly.

# INVERSION

## SEAT SURFACE MASSAGING

Harmonious vibration over a surface with three level settings to increase your blood circulation around the hip to the back of calves and ankles.

## CALF AND SOLE MASSAGING

Stimulation using Kneading, Swing and Rolling massage for the calves. Raise foot rest from sitting 0 degrees to lying 90 degrees, to promote your blood circulation by relieving stiffness from the feet where fatigue tends to accumulate.

## ROTATION AND RECLINE

Inversion Stretch allows you to set the chair angle as Deep, Medium and Fixed recline. The Deep recline can help release pressure on the spine, stress on the heart and strain on the muscles. By having the legs above the heart, this decompresses the spine so that your body nutrients can flow throughout, to help congested and/or damaged areas.
